

EduLearn

Intoweb's Edulearn system is a Learner Management System that manages student's details, courses registrations, assignments and marks.

Features

- Search by course, qualification, course module and SAQA standards
- Different campuses can have unique period scheduling for multiple campuses
- Manage once off course prices and monthly payments
- Records student payments
- Qualifications and awards consist of core and elective courses
- Qualification courses can be set on a yearly basis
- Course credits are managed
- Course scheduling
- Courses and assessments are split up into modules
- Courses and assessments are deadlines specified with email notifications
- Modules link to lecturers, eLearning, assessment or assignments
- Marking templates link to specific outcomes and assessment criteria
- Students register online with multi-dynamic forms
- Documentation uploads for registration, such as ID documents
- Processing of applications
- Scheduling applicants interviews
- Student portal for handling materials, feedback, finances and uploads of assignments
- Bulk email and sms's for students
- Module and marking temple weightings

System Integrations

The Edulearn system can be integrated with Intoweb's Staff Management System, Biographical Details, Online Leave Management System, Attendance Management System, Surveys Management System, Assessments Management System, Edutrain (eLearning), Helpdesk Management System, Discussion Forms and Financial Management System
